# Australian Shepherd Health \& Genetics Institute, Inc. The Australian Shepherd Comprehensive Breed Health Survey <br> <br> August 2009-August 2010 

 <br> <br> August 2009-August 2010}

The Australian Shepherd Health \& Genetics Institute, Inc. (ASHGI) conducted this survey from August 2009 through August 2010. ASHGI contracted with Elements Software Engineering, LLP (ESE) of Hurley, Wisconsin for technical support based. ESE programmed and hosted the web version of the survey and stored the data on its server while the survey was operational. ASHGI prepared electronic and paper versions of the survey form for those who did not wish or were unable to utilize the web-mounted version. Responses submitted by electronic copy or on paper were entered into the web-mounted database. The survey was advertised in both the Aussie Times and the Australian Shepherd Journal and heavily promoted on breed discussion lists and via ASHGl's international club contact list.

This survey was intended for purebred Australian Shepherds born from January 1,1990, through December 31, 2005. Our overriding goal was to obtain data that would allow us to gauge the frequency of various health and genetic issues in the breed. We also sought more detailed information on each item which will help us in our educational efforts on behalf of the international Australian Shepherd breed community.

Some respondents did not complete all sections of this long and detailed survey, therefore the number of responses is indicated with each section heading and percentages within the section are based on that number unless otherwise noted.

For the purposes of this survey, the word "dog" referred to any Australian Shepherd regardless of gender. When gender is pertinent "male" or "female" were used.

Veterinary confirmed? Yes 104 89.66\%
2. Was an autopsy/necropsy performed? Yes 19 12.42\%
3. If this Aussie died of cancer, were biopsies or a necropsy done to confirm the diagnosis? Yes 42 62.69\%

## III. In Depth Health Questions

The following questions will deal with specific areas of your dog's health. Please answer questions to the best of your knowledge and if the condition was diagnosed by a veterinarian. Select all conditions your Aussie may have encountered.
A. Medication Reactions

598 dogs

1. Multi-Drug Reactivity 1 (MDR1)
a. Has your dog been tested for the MDR1 mutation? Yes 213 35.62\%
b. If yes, what was the result:

Two normal copies $127 \quad 59.62 \%$
One copy of mutation $\quad 73 \quad 34.27$
$\begin{array}{lll}\text { Two copies of mutation } & 13 & 6.10\end{array}$
c. If no, has your dog been cleared by parentage (both parents tested Normal/Normal)? Yes 13 2.17\%
d. If no, has your dog been diagnosed as having the mutation based on reaction to one or more of the listed drugs? Yes 8 1.34\%

If yes, what drug(s) did your dog react to?

| Acepromazine | 3 | $33.33 \%$ of those that reacted |
| :--- | :--- | :--- |
| Butorphenol | 1 | 11.11 |
| Immodium | 1 | 11.11 |
| Ivermectin product | 4 | 44.44 |

2. Has this dog reacted to anesthesia or sedation medications not related to its MDR1 status? Yes $203.34 \%$
a. Reacted to:

Single drug $5 \quad 25.00 \%$ of those that reacted
Drug combo 420.00
Unknown 840.00
b. Please describe the reaction(s)

| Behavioral | 2 | $10.00 \%$ of those that reacted |
| :--- | :--- | :--- |
| Cardiovascular | 3 | 15.00 |
| Neurological | 3 | 15.00 |
| Prolonged recovery | 9 | 45.00 |
| Other | 2 | 10.00 |

3. Has this dog reacted to other types of medication not related to its MDR1 status? Yes 23 3.85\%
a. What drug(s)

| Antibiotics | 6 | $26.09 \%$ of those that reacted |
| :--- | :--- | :--- |
| Antiparasitic | 8 | 34.78 |
| Painkiller | 3 | 13.04 |
| Steroid | 2 | 8.70 |
| Decline to state | 1 | 4.35 |
| Other | 3 | 13.04 |

b. Please describe the reaction(s)

| Abnormal blood counts | 2 | $8.70 \%$ of those that reacted |
| :--- | ---: | :---: |
| Allergic | 8 | 34.78 |
| Gastrointestinal | 10 | 43.48 |
| Lethargy | 2 | 8.70 |
| Neurologic | 2 | 8.70 |
| Polydypsia | 2 | 8.70 |
| Other | 4 | 17.39 |

B. Skeletal Structure 598 dogs

1. Hips
a. Were the dog's hips ever x-rayed for evaluation?: Yes 422 70.57\%
b. Was the dog evaluated by OFA? Yes $24457.82 \%$ of those evaluated
2. Did the dog receive and OFA preliminary evaluation? Yes 29 11.89\% of OFA
a. Age (in months)

| $6-9$ | 1 | $3.45 \%$ |
| :--- | ---: | :--- |
| $10-12$ | 6 | 20.69 |
| 13 | 11 | 37.93 |
| $13-18$ | 3 | 10.34 |
| $19-24$ | 8 | 27.59 |

b. Result:

| Excellent | 9 | $32.26 \%$ of prelims |
| :--- | ---: | :---: |
| Good | 14 | 48.39 |
| Fair | 1 | 3.23 |
| Borderline | 2 | 6.45 |
| Mild | 3 | 9.68 |

c. If the dog was found to be dysplastic (ratings of Mild, Moderate or Severe,) was the condition unilateral? Yes $4100 \%$ of dysplastic on prelim

If yes, which hip was affected?

| Right | 2 | $50 \%$ |
| :--- | :--- | :--- |
| Left | 2 | $50 \%$ |

2. Did the dog receive an adult ( 24 months or older) OFA evaluation? Yes $230 \quad 93.50 \%$ of OFA
a. Age

| 2 years | 165 | $71.74 \%$ of OFA |
| :--- | ---: | :--- |
| 3 | 27 | 11.74 |
| 4 | 11 | 4.78 |
| 5 | 1 | 0.43 |
| 6 | 4 | 1.74 |
| No response | 22 | 9.57 |

b. Result:

| Excellent | 46 | $20.00 \%$ of OFA |
| :--- | ---: | :--- |
| Good | 147 | 63.91 |
| Fair | 18 | 7.83 |

| Total NBT offspring: at least 473 |  |  |

2. With how many mates did it produce puppies with tails that were not full length?

| 1 | 61 | $64.89 \%$ of NBT prod |
| :---: | ---: | :---: |
| 2 | 21 | 22.34 |
| 3 | 1 | 1.06 |
| 4 | 2 | 2.13 |
| 5 | 2 | 2.13 |
| 6 | 1 | 1.06 |
| 7 | 1 | 1.06 |
| 13 | 1 | 1.06 |
| No response | 4 | 4.26 |

3. How many of those mates do you know had less than full length tails?

| None | 25 | $26.60 \%$ of NBT prod |
| :--- | ---: | :---: |
| 1 | 29 | 30.85 |
| 2 | 8 | 8.51 |
| 6 | 1 | 1.06 |
| Unknown | 28 | 29.79 |
| No response | 3 | 3.19 |

4. How many of the offspring with less than full length tails required euthanasia due to severe birth defects?

| None | 74 | $78.72 \%$ of NBT offsp | $94.87 \%$ of responding NBT producers |
| :--- | ---: | :---: | :---: |
| 1 | 3 | 3.19 | 3.85 |
| 5 | 1 | 1.06 | 1.28 |
| No response | 16 | 17.02 | $n / a$ |

S. Has your dog produced one or more offspring which had long tails that were left undocked? 241 dogs

| Yes | 82 | $34.02 \%$ |
| :--- | ---: | :---: |
| No | 150 | 62.24 |
| Don't Know | 9 | 3.73 |

1. If yes, indicate offsprings' typical tail carriage(s) when relaxed (check all that apply)

| Low | 16 | $19.51 \%$ of undocked full tail prod |
| :--- | ---: | :--- |
| Slightly below topline | 33 | 40.24 |
| Level with topline | 31 | 37.80 |
| Above topline | 38 | 46.34 |
| Over the back | 18 | 21.95 |
| No response | 4 | 4.88 |

2. Indicate offspring's tail type(s) (check all that apply)

| Straight | 13 | $15.85 \%$ of undocked full tail prod |
| :--- | ---: | ---: | ---: |
| Slightly curved | 70 | 85.37 |
| Strongly curved | 7 | 8.54 |
| Curled | 13 | 15.85 |
| No response | 5 | 6.10 |

3. Indicate offspring's tail feathering type(s) (check all that apply)

|  | 5 | $6.10 \%$ of undocked long tail prod |
| :--- | :---: | :---: |
| None |  | 65.85 |
| More profuse at base, shortnng to tip | 54 | 25.61 |
| Equally profuse from base to tip | 21 | 8.54 |

T. Has your dog produced one or more offspring with other health conditions which you would like to report? 240

| Yes | 14 | $5.81 \%$ |
| :--- | ---: | :---: |
| No | 19 | 7.88 |
| Don't Know | 207 | 85.89 |
| No response | 1 | 0.41 |

If yes, indicate what condition (s) and how many offspring:

| Behavior | 1 | $0.41 \%$ |
| :--- | :--- | :--- |
| Dental | 1 | 0.40 |
| Eyes | 5 | 2.07 |
| Immune mediated | 1 | 0.41 |
| Neurological | 1 | 0.41 |
| Reproductive | 2 | 0.83 |
| Skeletal | 3 | 1.24 |

V. Research Participation (optional) 585 dogs

If your dog has had health problems or had near relatives with health issues, have you submitted samples and/or data to research? Yes 79 13.50\%

If yes, which studies (list all)

| AHT Cataract | 12 | $15.19 \%$ of research participants |
| :--- | ---: | :---: |
| Behavior | 8 | 10.13 |
| Cancer | 5 | 6.33 |
| DNA banking | 10 | 12.66 |
| Coat color | 1 | 1.27 |
| Epilepsy | 45 | 56.96 |
| MDR1/Epilepsy | 1 | 1.27 |
| No response | 6 | 7.59 |

## VI. Additional Comments (optional)

If there is anything else you'd like to mention that was not in the Health Survey, please o so here:
127 people, $33.96 \%$ of the 374 who participated took the time to offer some kind of additional comment. Comments varied considerably and included thanks to ASHGI for doing the survey, specific data for IDASH, additional explanation/information regarding survey entries, family health history, information not covered elsewhere in the survey. and special things about their Aussies that they wanted to share.
